

# Animal Science

## for Pre-school

In this class students will learn some amazing things about animals! Every week will explore a new creature or two and we'll learn about each animal's characteristics, abilities, habitats, needs and care. Students will also experience some hands-on opportunities to touch, hold, examine and observe some live animals that will be visiting the classroom! Some weeks we will have the students bring in their own stuffed animals when real ones are not available.

week 1: cats

week 2: puppies

week 3: goats & sheep

week 4: ducks, chickens & other birds

week 5: bunnies

week 6: turtles & frogs

Week 7: horses

week 8: dogs

week 9: cats/kittens
